

ProfelmNet®

RF remote rolling code or dipswitch coding receivers

This RF remote receiver due to a very compact size, can be installed in any electronic appliance which needs to be activated remotely from a distance with a unique safe against intruders. Very useful for overhead garage doors, alarm systems, access control, electric strikes.

This best quality and high technology RF receiver offers:

- Microchip KEELOQ rolling code technology or constant dip-switch coding.
- Suitable for all electronic appliances which need a dry contact activation output
- Available in 1 to 4 channels
- Relay contacts: 3A/230VAC
- Working temperature: -10...50°C
- Compact size 80(L) X 45(W) X 30(H) including the ABS housing.

Our rolling code transmitters exploit high tech **Microchip Keeloq** rolling code techniques for the codification of the output signal. Our transmitter code includes a **customer code** for dedicated use and there cannot be

Available models

Order number	Power supply	Freq. (MHz)	Codification	channels	Relay PUSH ON	Relay PUSH ON/OFF
PSR-13RS	12VAC/DC Or 24VAC/DC	433,92	Rolling	1	Yes	No
PTR-13RS		868,30	Rolling	1	Yes	No
PS-13RS		433,92	Motorola	1	Yes	Yes
PS-13RSN		433,92	National	1	Yes	Yes
PR-13RS		318	Motorola	1	Yes	Yes
PR-13RSN		306	National	1	Yes	Yes
PS-14RS	12VAC/DC	433,92	Motorola	2	Yes	Yes
PS-14RSN		433,92	National	2	Yes	Yes
PR-14RS		318	Motorola	2	Yes	Yes
PR-14RSN		306	National	2	Yes	Yes
PS-16RS	12VAC/DC	433,92	Motorola	4	Yes	Yes
PS-16RSN		433,92	National	4	Yes	Yes
PR-16RS		318	Motorola	4	Yes	Yes
PR-16RSN		306	National	4	Yes	Yes

KEELOQ® patented by Microchip provides both access and security to systems in which it is use
